

Is Religion Poison?

Unmasking the Deadliest Religion

CANDICE CIZUT

Introduction

Welcome to the rabbit hole. This isn't a comprehensive manual but a glimpse—a brief yet sharp jolt designed to awaken you to the truth behind **religion's grip on society**.

Have you ever wondered why the world continues to spiral into chaos despite the abundance of churches, gurus, and self-proclaimed spiritual leaders? Morality weakens, order crumbles, and the promises of a better world seem ever more distant. Is religion to blame, or is it something deeper, more insidious?

The word “religion” originates from the Latin verb *religare*, meaning “to re-bind” or “to bind fast.” And bind we have. People are **shackled—by dogma**, systems, rules, rituals, and empty rituals. But true religion, as defined by the **Kybalion**, is an *intuitional realization* of the existence of *The All*—a divine force—and understanding one's intimate relationship with it.

Theology, on the other hand, is a human attempt to impose personality, structure, and control over the divine, pretending to be the “middleman” between us and what lies beyond. These middlemen, disguised as our saviours, **are the thieves of our sovereignty. They manipulate, bind, and drain.**

In these pages, I aim to stir something inside you—a thirst for the *Religion of Truth*. **Maybe the truth is not relative but objective just like morality.** Imagine a world where we, as sovereign beings, take back our power, create our destinies, and expose the veils of deception.

I invite you, the seeker, to explore the reasons behind the decline of true morality and order, and uncover the *deadliest religion at the heart of this spiral*. This book is only the beginning, and I hope it fuels your curiosity to dive deeper into the rabbit hole. The truth is out there, waiting to be uncovered.

Let's create a better world together.

Origins of Religion

Religion—an idea, a system, a way of being—has weaved its way through the very fabric of human history. But have you ever wondered: **could it have been designed not to elevate us, but to enslave us?** Could dark, nefarious forces have planted the seeds of these religions, not to guide our spiritual growth, but to keep us in chains, bound to a system of obedience and control?

Consider this: within the frameworks of modern religion, there may lie remnants of ancient wisdom—guidelines, truths, and knowledge passed down through the ages from our ancestors.

Yet, somewhere along the line, these ancient truths have been corrupted—twisted, manipulated, and contaminated by dark forces with agendas of power, control, and greed. These forces, operating from the shadows, have used religion to shape society, not to uplift the collective consciousness, **but to maintain their iron grip on the masses.**

The origins of religion are deep, hidden beneath layers of time and human evolution. And therein lies the problem: they are difficult to pinpoint, obscured by centuries of rewriting, reinterpreting, and suppressing the truth.

Many scholars believe **that organized religion emerged in the Near East during the Neolithic Revolution, roughly 11,000** years ago, when human beings shifted from nomadic life to settled agricultural societies. The transition from a more animistic, nature-based belief system to the complex, hierarchical religions of today was likely influenced by new economic and political forces. But, what if this was just the beginning of a much darker story?

Religions of old, such as animism, were rooted in reverence for nature, for the land, for the unseen energies that govern our world. These beliefs may seem primitive to some, almost “silly” when compared to the institutionalized religions of today. Yet, in their simplicity, these ancient belief systems were far closer to understanding the natural world and our place within it than the religions that would follow. The truth they carried was direct, unfiltered, and in harmony with the universe—something the organized religions would soon suppress, warp, and replace.

Can we truly understand the origins of religion without addressing the distorted and suppressed history of humanity itself? No, we cannot. The key to unlocking the truth behind organized religion lies in understanding our true origins. When did humans first appear on this planet? Who created us? Are we truly alone in the universe, or have we been visited, influenced, and shaped by forces beyond our comprehension? And if the truth is hidden, why has it been suppressed for so long?

The questions are uncomfortable, yet essential. The history of our species has been deliberately obscured, covered up by those who wish to control the narrative, the power, and the very essence of what it means to be human. Disclosure—true, full disclosure—has been delayed, diverted, and suppressed by those who benefit from keeping the truth from the masses.

As we begin to peel back the layers of religion’s origins, we must first confront these questions. It’s time to understand not just where religion came from, but why it was crafted the way it was—and who, ultimately, benefits from keeping us in the dark.

In the pages to come, we’ll dive deeper into these ideas and unravel the truth that has been hidden for millennia. Are we ready for the answers? Or are we too afraid to face them?

Dangers of Religion

Religion, in its most distorted form, has become a weapon that stifles progress and warps the human spirit. For scientists, it can erode rationality, hinder innovation, and suppress breakthroughs that might have otherwise propelled humanity to unimaginable heights.

Imagine where our technology and understanding of the universe could be if not for the centuries lost to dogmatic oppression. Let me be clear—I'm not advocating for scientism, that blind worship of science as the new god. But there's no denying that warped religion has often shackled the pursuit of truth.

For the truly spiritual, religion often poses an even greater threat. Instead of elevating the soul, it can damage the psyche, trapping consciousness in a cycle of guilt, fear, and submission. Far from fostering morality, it may even fuel immorality—wars fought in the name of unseen gods, hatred justified by ancient texts, and leaders weaponizing faith to divide and conquer. Yet, so many will claim, *my religion is different*, unwilling to question the mental prison in which they reside.

And let's not forget the blood spilt in the name of religion. Crusades, jihads, inquisitions—history is stained with the violence of belief systems that demand loyalty unto death. These are not the religions of life, love, or truth. *They are the religions of death, pitting brother against brother, human against human, in service of gods who remain silent as the carnage unfolds.*

What follows is extracted from page 61, Chapter 11 - Control System from the book Fringe Knowledge!

“Religion gives people a feeling of security in exchange for unquestioning obedience. On the positive side it encourages devotion to ideals higher than just material success, like helping others or serving a divine cause. On the negative side religion can be horribly misused to program people like robots and make them do stupid things like hate and kill those of a different religion.

The main role of religion throughout history has been to keep society well-behaved. This was done by imprinting children with moral codes and instilling a fear of authority that molded them into law-abiding and hard-working citizens. But unlike spirituality, religion aimed to enforce good behavior through programming and intimidation rather than true understanding, so the improvement to society came at the cost of ignorance.

Today, those who are spiritually smart can extract and combine the truths from any religion to increase their own wisdom; those who are spiritually weak join religions simply to belong to something, and they end up swallowing and parroting a rigid belief system that they do not even understand. Sadly, nasty individuals also use religion to make themselves appear nicer than they really are, like wolves dressing themselves in sheep's clothing. Some of them even become famous preachers or ministers who scam their thousands of naive followers.

But the worst purpose that organized religion serves is to spiritually drain and enslave mankind. Whenever someone blindly obeys questionable sources of authority rather than listening to his own heart, part of his soul shrivels from neglect. Whenever someone begs an external authority for strength and assistance rather than realizing that divine power is within, soul energy is lost to this external authority and it becomes harder

to access the inner divine power. Whenever someone believes something without experiencing, pondering, or intuiting it for himself and then goes around pushing it onto others, his ability to think new thoughts decreases and he becomes ever more robotic. Organized religion encourages all of these.

What higher negative forces want is for humans to be well-behaved robots who freely give up their soul energy, and religion helps accomplish this. When people in church pray towards some statue or image outside of them, their energy escapes into the air where negative forces collect it for their own nefarious uses. Churches can therefore often function as the etheric equivalent of dairy farms. Anyone with spiritual common sense would do well to focus on cultivating love and wisdom through private study and personal experience rather than unwittingly selling their energy for it through organized religion.”

Religion, poisoned by power and politics, has turned into a weapon of control and division. But you, dear reader, have the choice to rise above it. To question. To seek. To refuse the chains of fear and ignorance. Let this chapter be your call to action: reclaim your sovereignty, find the divine within, and reject the narrative that keeps humanity bound to its knees.

Religion of Money

In this modern age, it seems **we have traded gods of the heavens for gods of gold**. Look around, and you will find the altars of Mammon everywhere: corporate skyscrapers reaching into the clouds, financial institutions teeming with wealth yet void of humanity, and the relentless worship of paper promises we call currency. What is the true price of this devotion?

Consider this: a person may claim unshakable moral convictions, presenting an image of virtue and piety to the world. **Yet, when money enters the equation, values crumble**. The very ones who declare themselves righteous will trade their integrity for the right price, plastering themselves across platforms for profit. Does this not prove that for many, the god they worship is not divine but **Mammon**, the deity of greed?

The priests of this religion wear tailored suits and sit in the hallowed halls of central banks. Their gospel is written in interest rates, debt, and financial instruments so complex they bewilder even seasoned economists. **These are the same central bankers accused of orchestrating economic collapses and tragedies like the infamous sinking of the Titanic to consolidate power and wealth**. And yet, most of us dare not question their motives, fearing the dreaded label of "conspiracy theorist." Is it not time to ask why these bankers hold such sway over our lives and our futures?

In the United States, the religion of money is literally enshrined in its currency. The dollar bears mysterious symbols—a pyramid capped with the all-seeing eye and the phrase "In God We Trust." But what god is this, exactly? Why would a symbol associated with ancient occult traditions adorn the world's most powerful currency? **Is it a coincidence or an open declaration of Mammon's rule?**

Even the so-called spiritual institutions have not escaped the clutches of Mammon. Churchianity today preaches the gospel of prosperity—a seductive promise of wealth in exchange for unwavering faith and generous tithes. The message of love and service to others has been overshadowed by the pursuit of material gain. Religious institutions, some of which are obscenely wealthy, now form unholy alliances with bankers and power brokers. The Vatican itself, cloaked in mystique, holds unimaginable wealth while countless faithful live in poverty.

Mammon's grip is not limited to individuals or institutions; it permeates entire industries. Big Oil ravages the planet in pursuit of profit. Big Pharma floods our bodies with chemicals for the sake of shareholder returns. Big Tech mines our data and our minds, transforming us into products. And through it all, the relentless drumbeat of "greed is good" drowns out voices calling for balance, sustainability, and true fulfillment.

Perhaps the most insidious aspect of this religion is its symbols and rituals, many of which we perform without question. We swipe credit cards like rosary beads, check our bank balances like holy scriptures and dream of riches like pilgrims seeking salvation. But what are we really worshipping? And at what cost? Mammon's allure is powerful, but it is a false god, offering fleeting pleasures and empty promises. To free ourselves from its grasp, we must begin by questioning its rule. Why do we measure success in dollars rather than in joy, in connections, or in service to others? Can we create a world where money serves humanity rather than enslaving it?

The time has come to recognize Mammon for what it is—a cunning, all-consuming force. The question is: will you continue to kneel at its altar, or will you break free and reclaim your sovereignty?

Religion of Government

Religion and government have long walked hand in hand, two faces of the same coin. Religion offers a feeling of security, a moral framework that promises salvation in exchange for unquestioning obedience. **Government mirrors this dynamic, demanding loyalty and submission while branding itself as the ultimate guardian of order and progress.** Together, they forge a partnership that thrives on control, not liberation.

Consider the nature of this control. Government programs people to act like robots, compelling them to hate and kill those of different nations, just as warped religion has done to pit believers against one another. Under the guise of patriotism or faith, governments have waged wars and oppressed dissent, turning human beings into pawns **in a game played by unseen hands. Have you ever questioned why this dynamic persists?**

The word “government” itself is telling. Derived from Latin, *gubernare* means “to steer” or “to direct,” and *mens* means “mind.” Together, they translate to **“mind control.”** This is no coincidence. Through laws, education systems, and propaganda, governments shape how we think, act, and perceive the world. Is this governance, or is it a religion—a belief system that **demands submission** to an authority that claims to know better than we do?

And yet, the truth is that no one has a right to control another. The religion of authority—whether cloaked in the robes of clergy or the suits of politicians—relies on our consent, our willingness to bow before the illusion of power. But why do we continue to kneel?

Throughout history, political institutions have worked with deadly religion and hidden cabals to maintain their grip on humanity. Monarchs claimed divine right to rule, aligning themselves with the church to legitimize their authority. In modern times, the partnership is more insidious.

The deep state, intelligence agencies, multinational think tanks, and shadowy organizations like the Bilderberg Group, Trilateral Commission, and Council on Foreign Relations operate behind the scenes, shaping policy and deciding who holds power.

These entities, often dismissed as conspiracy theories, are anything but imaginary. They wield influence far beyond elected officials, pulling the strings of nations and economies. Could it be that the cabal we will reveal is the true architect of this system? A system designed not to serve humanity but to enslave it?

Symbols of government, like religious icons, reinforce this control. Flags, national anthems, and political slogans serve as tools of indoctrination, inspiring devotion and discouraging dissent. The global institutions we are told to trust—the United Nations, intelligence agencies, central banks—function as temples of the modern age. **But who do they really serve?**

The unholy trinity of religion, government, and hidden cabals thrives on division. It divides us by race, class, nationality, and ideology, keeping us distracted while they consolidate power. The very institutions we look to for guidance and protection often perpetuate the chaos they claim to resolve.

It is time to question everything. **Why do we pledge allegiance to systems that prioritize profit over people, obedience over freedom? Why do we allow ourselves to be ruled by masters—whether religious leaders, politicians, or shadowy elites?** The truth is clear: no more masters, no more slaves.

To dismantle the religion of government, we must reject the illusion of authority. We must reclaim our sovereignty and awaken to the reality that we are capable of governing ourselves. The path forward is not one of submission but of self-awareness, courage, and the relentless pursuit of truth.

In this awakening, we find liberation—not through the dictates of a government, not through the rituals of religion, but through our own innate power and wisdom. The religion of the government has had its time. Let us now rise as free individuals, unshackled from **the chains of authority** and united in the pursuit of true freedom.

Religion of New Age

New Age spirituality is a hodgepodge of ideas, often dismissive of rationality and critical thinking. It promotes blind faith in gurus, light beings, and mystical rituals, **many of which sap energy and leave followers disoriented and detached.** For some, it becomes an excuse to abandon their sacred gift of life, trading purpose and zeal for an endless quest to escape reality.

I've been there—immersed in communities that drained my vitality, left me ungrounded, and dulled my passion for life. **Meditation became an escape, not a tool for clarity.** But I learned that balance is the key. Rationality, intuition, and personal experience must guide us—not the empty promises of self-proclaimed masters or nebulous doctrines.

This isn't to dismiss the New Age entirely. There is value to be found, often more so than in traditional religions. But we must navigate it with discernment, questioning those who preach passivity or submission. **The truth lies in embracing life, grounding ourselves in reality, and trusting our inner wisdom.**

The time has come to reclaim our power, to live fully, and to question any belief system—New Age included—that asks us to escape rather than engage. True spirituality is not about retreat; it's about rising, thriving, and making this life a masterpiece. **Stop looking to external saviours!**

Deadliest Religion

You've made it this far, seeker. What comes next, take with a grain of salt—or perhaps the whole shaker. If you uncover this as truth, let it ignite your curiosity, your action, and your voice.

Through years of study, conversations with thinkers, and exploration of hidden corners of knowledge, I've arrived at this unsettling conclusion: the deadliest religion is not one of temples, prophets, or scriptures. It is the shadowy web of dark occultists—hyperdimensional beings, secret societies, and ancient traditions corrupted into tools of control.

Could the whispers of conspiracy—the Dark Luciferians, Order of Death, Canaanite Cults, Moloch Worshipers, Skull and Bones, the Brotherhood of Shadows, and the Order of the Black Sun etc —carry a chilling truth? Could these dark practitioners be the sorcerers of our age, weaving mind control, coercion, and manipulation into every thread of our reality?

These groups operate as a religion in every sense. They have gods, often non-organic and parasitic. They have priests, rituals, texts, tenets, and a singular mission: to feed on humanity, suppress the evolution of our souls, and dominate every aspect of life—politics, money, government, and even spirituality. This is the religion of shadows, where power is worshiped, control is sacrosanct, and humanity's divine potential is their greatest threat.

The deadliest religion isn't just out there—it's in the systems that shape your world, the beliefs you've never questioned, and the silence you've been trained to keep. Will you break free? The spark of divinity lies within you. Harness your inner power, and watch fear dissolve in its radiant light.

Rabbit Hole

I once found myself consumed by the pursuit of financial freedom. While there's nothing inherently wrong with seeking wealth, the relentless chase can entrap you. Be cautious of how you pursue it—money should liberate, not enslave. **Breaking free financially is vital, as glorifying lack, often celebrated in New Age circles, can stifle your spiritual growth.**

If you're curious about my journey read my books like [Matrix Escape Success](#). The new chapter of my life is focused on the Sciences of Universal Laws, Personal Power, Dropping Importance, Spirituality, True Freedom, True Wealth, Service to Others, Happiness, and Truth. My mission now is to live more grounded and fully present in the now.

But here's my challenge to you: question everything. Blind faith has no place on this journey—seek, process, and filter knowledge with discernment.

Below are three resources I highly recommend that have also informed this book.

1. The Kybalion
Explore this timeless text to gain insights into the universal principles of life. Free versions are widely available online.
2. Fringe Knowledge for Beginners
This accessible guide dives into hidden truths and alternative perspectives. Download it here: [Fringe Knowledge PDF](#).
3. What on Earth Is Happening
A powerful video series by Mark Passio that examines the hidden forces shaping our reality. Watch it here: [Mark Passio YouTube Channel](#)
